- Public funding per capita: \$35.51

Sales measures include passenger electric vehicles (EVs). Manufacturing Employment and Investment refers to announced investments in EV assembly, EV parts, EV charging infrastructure, batteries, mineral processing, and battery recycling facilities. Charging refers to publicly accessible chargers, and rankings and growth include Level 2 and fast chargers. Utility Investment refers to investor-owned utilities only. Public funding includes both awarded and allocated funds. Totals are cumulative unless stated. Rankings are for all time, except for market share which is taken for the past 12 months. Growth is taken from July 1, 2024 to June 30, 2025. Source: [Atlas EV Hub](#) and [EV Jobs Hub](#)

Florida Highlights in Q1 and Q2 2025

- Florida continues to lead the region, reaching a high of 10.9 percent EV market share in Q2 2025 and serving as the only state to surpass the 9.5 percent average annual national EV market share.
- In January 2025, Florida was awarded \$37 million in Round 2 Charging and Fueling Infrastructure (CFI) grants from the Infrastructure Investment and Jobs Act, more than any other state in the Southeast. Broward Metropolitan Planning was awarded nearly \$18 million to install 339 EV charging ports along the county's Alternative Fuel Corridors. Though the Trump Administration has not formally canceled the CFI program yet, CFI funds have yet to be obligated and remain under threat.
